OUR KEY SERVICES

Enterprise and Mobility Apps Development

Mobility solutions provide enormous opportunity to organizations that are under increasing pressure to reduce costs while maintaining tight control over business operation and enhancing productivity. We design and develop, native as well as hybrid, mobility apps with cloud based backend management portal and legacy/ERP integration. In web technologies specialize in Microsoft .NET & Azure, SAP Hana Cloud Apps, Responsive Web Portal and native mobile apps for Windows, Android and iOS platforms.

Technology Stack:

Enterprise Cloud/>

System Integration

We understand the complexities involved in large system integration projects. With our experienced engineering team and robust project management practices, we ensure timely delivery of integration projects and manage risks proactively using our RACE methodology – a continuous assessment of risk and cost during the project lifecycle. We have expertise in design engineering, installation and maintenance of SI projects in following domains:

- Industrial Automation
- Oil & Gas Retail Automation
- Access Control, Identity Management & Surveillance

Managed Services

It is imperative that selection of right managed service provider is crucial in getting anticipated business benefits for any organization. Our Managed Service offering is a matured L1/L2/L3 support services with strict adherence to SLA. Our success in managed services lies in our strong project management capabilities and continuous training & development of our workforce.

PRODUCT PORTFOLIO

IMPS MILK PROCUREMENT ERP

- Centralized milk collection and distribution
- Society-to-Plant level integration using mobile & web
- Complete payroll generation with incentives & commissions
- Automated reconciliation of collection vs. dispatch
- Add-on modules for cattle-feed/veterinary medicine supply chain and animal husbandry services

MOBILITY SOLUTIONS FOR FIELD OPERATIONS

- On-spot billing for utilities
- Payment collection and reconciliation
- Cash In-Transit and ATM replenishment
